Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The indicated allowability of claims 3-9,11-32 and 45 is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 2-6, 9-14, 17-25, 30, 31, 33-36, 37, 39, 41, 43 45 and 46 are rejected under 35 U.S.C. 102(e) as being anticipated by Purkis et al., U.S. 6,567,013.

Regarding claims 2-6, 9-14, 17-25, 30, 31, 33-36, 45 and 46, Purkis et al. discloses all the claimed limitations including the hydraulically controlled tool devices (144, 146... 156), hydraulic control lines (A-D), decoders (158, 160... 170), main valves (180, 182...190) wherein the other control lines directly communicating (across 172 and 174) with the tool and applying a unique pressure range within a control line to open a main valve (col. 9, lines 39-56).

Regarding claims 37, 39, 41 and 43, Purkis et al. discloses all the claimed limitations including decoders (158, 160... 170), a first control line (A), a second control line (B), a third control line (C) and a crossover (D) connecting each decoder.

Allowable Subject Matter

Claims 7, 8, 15, 16, 26-29, 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claim 37, filed 12 September 05 have been fully considered but they are not persuasive.

Applicants argues the control lines of the prior art does not constitute a crossover as recited in applicant's specification.

The recitation "crossover" alone does not carry meaning commensurate with the specification and can be considered to be a connection between the decoders detached from the control lines. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
